

**Page 136**

First paragraph under the subhead "15. R-Model Suspension,"  
replace the 4th sentence that begins, "By using pull-ahead SN-95  
front lower control arms . . ." with the revised text which follows:

[Lower control arms are OE '93 Mustang, tie-rod ends are '93 Taurus,  
and the spindles are pull-ahead '94 Mustang units with spacers  
welded on to adapt the longer '93 ball joints. With revised K-frame  
pivot points for the lower arms, camber during suspension  
compression is increased.]
